

II. SPECIFICATION AMENDMENTS

On page 1, please amend the Title as follows:

DIGITAL VIDEO CODING METHOD AND APPARATUS FOR CONTROLLING
ENCODING OF A DIGITAL VIDEO SIGNAL ACCORDING TO MONITORED
PARAMETERS OF A RADIO FREQUENCY COMMUNICATION SIGNAL

On page 1, after the Title, on line 4, please insert the following section:

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a continuation of and claims priority from
U.S. Patent Application No. 09/370,661, filed on August 6,
1999.

Please amend the Abstract on page 18 as follows:

~~Digital Video Coding~~

Abstract of the Invention

~~Method and apparatus~~A mobile terminal includes means for
controlling the operation of a video codec designed for
encoding of a digital video signal that further includes data
suitable for radio transmission between a network and a mobile
station. The invention is particularly applicable where the
transmission errors are unpredictable, and entails means for
monitoring at least one or more parameters of the received or
transmitted parameter of a radio frequency communication
signal received at the mobile terminal. and providing a
feedback~~The control means also includes a means for forming a
signal based on to the monitored signal, the feedback~~

signalparameter for controlling the at least one encoding
parameters in the algorithm of the video codeparameter of the
video encoder.
